Subject: Protect Children's Television!

FCC Commissioner Jonathan S. Adelstein

Dear FCC Commissioner Jonathan S. Adelstein,

The FCC must consider the unique needs of children in its upcoming rulemaking on broadcast ownership rules

Children consume almost five and a half hours of media per day. Research has shown that media, particularly television, play a unique and powerful role in children's development.

The FCC should consider how further relaxation of media ownership rules would impact children's programming. Deregulation may reduce competition, increase commercialism and result in less original programming for children.

Before making any regulatory changes to existing media ownership rules, the FCC must consider how children will be affected.

Sincerely,

Carmen Brodt

FCC Commissioner Kathleen Q. Abernathy

Dear FCC Commissioner Kathleen Q. Abernathy,

I am a mental health therapist, doctoral student of pediatric [counseling] psychology, and a mother of three. I respect the rights entitled to individuals under the First Amendment but also think it important to protect the rights of those whom have no voices.

Research shows that television affects our children. Current trends in violence and precocious sexual activity can be linked to societal messages displayed in common media such as television. These messages get through not only to the children but the family unit, causing an erosion of boundary and limit setting on the parts of parents. We become **less** apt to view violent and sexual activity as non-normative when it is thrust in our faces daily. Moreover, current research trends shows it "takes a community to raise a child." Long gone are the days when mothers were able and willing to stay at home caring for the family. **Now** external support networks are arguably one of the most important factors preventing delinquency in children and adolescents today. Therefore, protection of the innocent rests in the hands of parents, community members, and legislators. We must strive on multiple levels to sustain the mental and emotional well-being of children. Without regulation of television, we may lose what sense of family dignity and respect of life and love this country was founded upon. Instead, materialism, explicit sexuality, and violence will take its place, attacking what is left of family values. Please take a stand against the non-regulation of television, considering the children and families that may be exposed to programming that is developmentally inappropriate, and the consequential effects this may have on our society.

Thank you for your time and interest in this matter.

Sincerely,
